

廃棄物管理施設 無停電電源装置の更新工事の概要

概略図	申請内容
<p>The diagram illustrates the power supply system for a waste management facility. It shows a flow from receiving and switching equipment through two main busbars to an Uninterruptible Power Supply (UPS) unit, which is connected to a battery. The UPS and battery are highlighted in red, and a bracket labeled '更新工事' (Renovation work) indicates that these components, along with the transformer below them, are the focus of the project. The transformer then feeds into load equipment. A dashed line labeled '廃棄物管理施設' (Waste management facility) encompasses the busbars and the UPS.</p>	<p>申請内容 廃棄物管理施設の無停電電源装置、蓄電池、変圧器の更新工事を実施する。</p>
